POWDER SHAKER

FY-ZD650

L1110mm×W1001mm×H979mm

New appearance upgrade

Meet the printing speed of 6-10 square meters per hour

Specifications

Model	FY-ZD650
Take-up and take-down media widths	0-600mm
Applicable media	Nylon,chemical fiber,cotton,leather,swimwear,wetsuit,PVC,EVA,etc.
Heating and drying function	Front guide heating,upper drying curing,single row of cold air cooling function
Material transfer method	Paper receiver traction type
Reel function	Automatic induction winding
Electrical parameters	220V 14A 3000W

Features

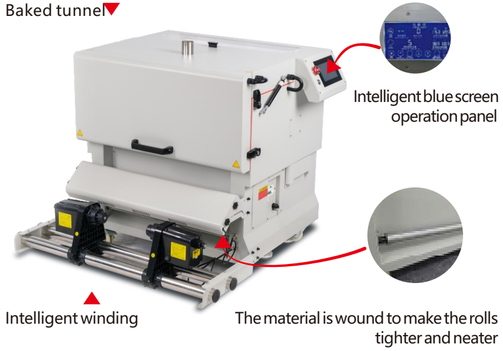
- In the performance can be other cases of the same kind of machine,the size control to perfection,can easily enter general 70cm to on a door.Also has great superiority on transportation costs,reduced the use of space,while smaller package sizes,big amplitude reduced transportation costs.

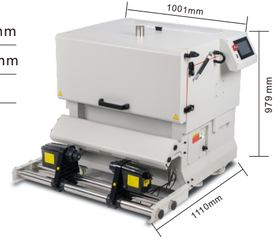
  The new design also solves the problems of two overlapping difficulties encountered in the past,such as the deformation of the caster top of the forklift.

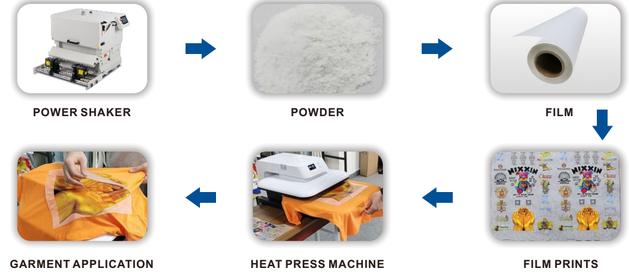
- Add 0.5KG powder,1.5 hours can continue to play the full picture,dozen small painting plus 0.5KG powder can continue to work 3 hours.Greatly reduce the artifical,big reduces thewaste of powder.

- The actual baking schedule 660mm of new machines,new design can make material more fully heated,made from type membrane under the condition of the constant shape,to eliminate the phenomenon of return oil and allow design to present the most perfect state.

- The new machines we increased the coiling series,can make the material more tight and neat.



Technical Parameters




Printer	1110*1001*979mm
Package	870*1120*1113mm
N.W 105KG	G.W 152KG
